1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-18, 32-53, 67-71, 74 drawn to displaying items and browsing descriptions, are classified in class 707, subclass 501.1.

II. Claims 19-31, 54-66, 72-73 drawn to a query and searching descriptions, are classified in class 707, subclass 3.

III. Claims 75-84 drawn to a selection rule based on specified descriptor components, are classified in class 706, subclass 45

IV. Claims 85-116 drawn to presentation rules, are classified in class 707, subclass 526.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the browsing descriptions in the invention I is for browsers while the searching descriptions in the invention II is for retrieving purpose. Likewise, the selection rule based on specified descriptor in the invention III is for making decisions while the presentation rules in the invention IV is presentation purpose. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2172

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
